

SENIOR TECHNICAL WRITER / INFORMATION ENGINEER, 2010,

Do you see it as a natural and exciting challenge to describe complex technical structures in a distinct and pedagogic way? Can you challenge the content and structure of technical information to improve pedagogy and understanding? Do you have a feel for language, style, and information flow? If developing technical information for cutting-edge telecom products appeals to you, you can become part of a diverse and motivated team working in an intense product development environment. This position involves complex products and places high demands on the information and therefore requires experience in technical writing.

REQUIREMENTS AND EXPERIENCES WE OFFER

Preferred skills, personal traits, and experience:

- Good abilities for multi-tasking and independent problem solving
- Analytical, thorough, communicative, and result-oriented
- MSc or BSc in computer science, electrical engineering, or similar
- Educational background in technical information and documentation
- Technical education at university level plus two or more years of experience in the technical information area
