## METHOD ENGINEER/MECHANICAL ENGINEER, SHANGHAI

Responsibilities include developing methods for the automotive and component level for bus repairs and maintenance. You either work based on CAD drawings or real coaches when developing methods. The task also includes, where necessary, creating and ordering new tools.

### REQUIREMENTS AND EXPERIENCES

#### Qualifications

- You are an experienced car/bus/truck repair and maintenance mechanic
- You have specific knowledge of the engine, electronics, pneumatics, hydraulics, mechanics, etc.
- PC skills and familiar with Windows and the most common software
- Ability to communicate in English is a requirement
- Technical education or equivalent is a plus.
- Knowledge of Scania or Higer products, systems and methods is a plus
